

Integrated Management System Policy

ANTWERP, 9 MAY 2025
VERSION 1

Purpose & scope

This policy applies to every activity, site, digital platform and subcontracted flow managed by **Aprojects** in support of project-cargo, break-bulk, road, rail, air and multimodal transport services. It underpins our certified **ISO 9001 Quality** and **ISO 14001 Environmental** systems and our active programmes to achieve **ISO 45001 Occupational Health & Safety** and **ISO 27001 Information Security** certification.

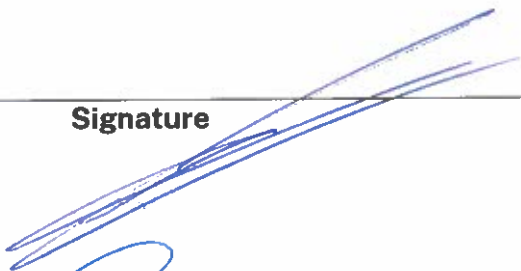

Core commitments

1. Satisfaction & quality	Deliver cargo reliably, on time, complete and damage-free, while tracking KPI's to support continual improvement.
2. Environmental stewardship	Reduce CO ₂ and fuel use through route optimisation, alternative fuels and modal shift (e.g., barge & rail).
3. Safe & healthy workplaces	Protect our people first by fostering a proactive safety culture. This includes behaviour-based safety, ergonomic work practices, healthy working conditions and occupational health programmes, while also ensuring rigorous load-securing and other high-risk-cargo controls.
4. Information & cargo security	Protect freight and data through an ISMS, access control, cyber-hardening and vetted partners.
5. Legal & ethical compliance	Meet ADR, IMDG, customs/AEO, GDPR and other statutory obligations while upholding our code of conduct.
6. Risk-based improvement	Use integrated SWOT and risk registers to set measurable objectives and act on audit results.
7. Engaged & competent people	Invest in training for staff, drivers and rigging crews, recognising that people are our greatest asset.
8. Corporate responsibility	Operate transparently, support local communities and build resilient, sustainable supply chains.

Leadership assurance

Top management will provide the necessary resources, set and review measurable objectives and re-evaluate this policy at least annually to ensure it remains effective and relevant.

Approval

Name	Position	Signature
Yoeri Torfs	CEO	
Gunter Van Assche	QHSE Manager	

By embracing this IMS policy, Aprojects demonstrates responsible leadership today and builds the quality, safety, environmental and security capabilities that sustain trust, performance and resilience across tomorrow's complex logistics challenges.
